CAREER OBJECTIVE

AI-focused Computer Science graduate with strong expertise in Python, Machine Learning, and Data Engineering. Experienced in building intelligent systems using deep learning, computer vision, and data pipelines. Passionate about Generative AI, LLM-based applications, and scalable AI solutions. Seeking an AI Developer role to design and deploy data-driven and intelligent systems.

EDUCATION

B.Tech (Honors) in Computer Science and Engineering

December 2021 – April 2025

Seshadri Rao Gudlavalleru Engineering College, Gudlavalleru

CGPA: 9.01

Intermediate, MPC

June 2019 – March 2021

Sri Chaitanya Junior College, Vuyyuru

Percentage: 87%

School, SSC

June 2007 – April 2019

Sri Chaitanya School, Vuyyuru

GPA: 9.8/10

PROFESSIONAL EXPERIENCE

Infosys Limited, Mysuru, Karnataka

June 2025 – September 2025

- Under gone rigorous training in software development, system Integration, and enterprise technologies.
- Contributed to live projects using Java and other modern stacks to build scalable IT solutions.
- Collaborated with cross-function al teams to deliver quality solutions aligned with client expectations.

SKILLS

- **Programming:** Python, Java
- **AI/ML:** Machine Learning, Deep Learning, NLP Basics, Computer Vision
- **Libraries & Tools:** PyTorch, OpenCV, Pandas, NumPy
- **Data Engineering:** SQL, ETL Pipelines, Data Transformation
- **Web & APIs:** REST APIs, Node.js, React.js
- **Cloud:** AWS (EC2, S3, Lambda), Cloud Fundamentals
- **Version Control:** Git
- **Concepts:** Data Structures, Operating Systems, Computer Networks

CERTIFICATIONS

- Cisco: PCAP-Programming Essentials in Python, CCNav7-Introduction to Networks.
- Coursera: Introduction to Cloud Computing.
- EdX: Machine Learning with Python, Data Science & Machine Learning Capstone Project.
- Wipro Talent Next Certification
- AWS Cloud Foundations
- AWS Cloud Architect

PROJECTS

1) CareerCraft AI – AI-Powered Resume Builder & ATS Analyzer

Tech: React.js, Flask, SQLite, SQLAlchemy, Python

- Developed a full-stack AI-powered career platform with Resume Builder, Resume Analyzer, and Job Matching System.
- Implemented ATS score calculation, resume skill extraction, job-role-based matching, and recruiter style job portal functionality using Python and Flask.
- Integrated SQLite database with SQLAlchemy and designed responsive React.js frontend interfaces connected through Flask REST APIs.

2) Expense Tracker–Full Stack Developer

Tech: MERN Stack

- Built a dynamic expense management system to track, categorize, and analyze user spending patterns.
- Implemented efficient data handling and aggregation logic to generate meaningful financial insights.
- Ensured robustness by handling edge cases such as inconsistent data inputs and transaction errors.

3) Object Detection Using YOLOv5 – ML Developer

Tech: Python, PyTorch, OpenCV

- Built a real-time object detection system using YOLOv5 for accurate image recognition and localization.
- Designed an image processing pipeline to detect objects and generate bounding boxes with optimized inference speed.

INTERSHIPS

AWS Cloud Virtual Internship

- Deployed cloud application using AWS EC2, S3, and Lambda, achieving 99.9% uptime.
- Automated serverless functions, reducing manual interventions by 50%.

Smart Internz Full Stack Development (MERN)

- Implemented ETL work flows for structured and unstructured data, enhancing data processing efficiency.
- Developed SQL-based analytics dash boards for business in sights.

AWS Data Engineering Virtual Internship

- Built data transformation Work Flows for diverse data sets, enhancing analytics readliness.
- CreatedS QL-driven dash boards for real-time business intelligence.

PAPER PUBLICATIONS

Creating Alert Messages Based on Wild Animal Activity Using Hybrid Deep Neural Networks

PublishedIn: UGC-Journal

Overview: Developed an AI-based model to detect wild animal movement and generate real-time alerts for preventing human-wildlife conflicts.

AI-ML Based Price Prediction Model for Agri-Horticultural Commodities

PublishedIn: UGC-Journal

Overview:Built a SARIMAX-based model to fore caste agricultural commodity prices, helping farmers make informed decisions.
